

Legend

-  Overburden
-  Mafic to intermediate volcanic flow
-  Moderate to strong silicification with epithermal veining
-  Mild silicification
-  Biotite feldspar porphyry
-  Clay altered shear
-  Brick red-maroon structural hematization and clear-grey silicification
-  Surface trace
-  Assumed contact
-  Certain contact
-  Drill hole trace
-  Collar
-  Weakly anomalous Au-Ag interval
-  Reported Au interval
-  Surface epithermal vein mineralization
